Introduction

This task-based English course is based on the Common European Framework of Reference and is designed for learners studying English for Grade 8, L2.

The course develops all four skills (listening, speaking, reading and writing) through a variety of communicative tasks, and systematically recycles key language items. Above all, it is designed to promote active (activating all new vocabulary and structures in meaningful, everyday situations), holistic (encouraging the creative collective use of students' brains as well as the linguistic analytical use of their brains) and humanistic (acquiring and practising language through pleasant tasks and topics, paying attention to their needs, feelings and desires) ways of learning.

The course consists of:

- The Student's Book which contains: a *Welcome back!* unit as well as six *modules* of six lessons each. There is also a *Fun Time* section and a *Revision* section at the end of each module. There is also a cartoon story at the end of every two modules. At the back of the book there is a *Festivities* section, a Reader and an *Evaluation* section with revision exercises.
- The Workbook which contains exercises to revise vocabulary and grammar structures presented in the Student's Book.

COURSE COMPONENTS

Student's Book

The Student's Book is in full colour. Each module is based on a single theme and the topics covered are of general interest. All modules follow the same basic structure (see Elements of a Module). Many tasks included in the Student's Book are multi-sensory, enabling students to practise all four language skills as they complete the task.

Workbook

The Workbook is in full colour and is divided into two parts. The first part, the Workbook, contains modules corresponding to those in the Student's Book containing practice in Vocabulary, Reading Comprehension, Writing and Everyday English. All the exercises in the Workbook are marked with graded level of difficulty (*, **). The second part, the Grammar, summarises and reviews the specific grammar items dealt with in each module of the course and offers additional exercises.

Teacher's Book

The Teacher's Book contains detailed teacher's notes, which provide:

- the objectives of each module clearly and concisely.
- step-by-step lesson plans and suggestions on how to present the material.
- a full key to the exercises in the Student's Book & Workbook.
- audioscripts of all listening material.
- evaluation sheets.

Class Audio CDs

The Class Audio CDs contain all the recorded material which accompanies the course.

Digital Book

The Digital Book contains all the material in the Student's Book and helps students monitor their progress and improve their stats, which are recorded and stored so that they can be accessed at any time.

ELEMENTS OF A MODULE

Each module starts with a module presentation page to familiarise students with the language and patterns in the module. The module presentation pages also whet students' appetites by familiarising them with some of the text types, pictures and activities found in the coming module.

Each module contains the sections described below.

Vocabulary

Vocabulary is introduced in a functional and meaningful context. It is practised through a variety of exercises such as picture-word association and completing set phrases in order to help students use everyday English correctly.

Reading

Each module contains a wide variety of reading texts such as emails, blog entries, letters, articles, etc. These allow skills, such as reading for gist and reading for specific information, to be systematically practised.

Grammar

The grammar items taught in each module are first presented in context, then highlighted and clarified by means of clear, concise theory boxes. Specific exercises and activities methodically reinforce students' understanding and mastery of each item. The Workbook contains a detailed explanation of each grammar point.

Listening

Students develop their listening skills through a variety of tasks which employ the vocabulary and grammar practised in the module in realistic contexts. This reinforces students' understanding of the language taught in the module.

Writing

Students develop their writing skills through the use of all four language skills.

Guided practice of the relevant vocabulary is given and consolidated and followed by a model text which is thoroughly analysed. Plans are also provided to guide students.

There are writing activities throughout the modules, based on realistic types and styles of writing, such as letters, notes, postcards and emails.

These progress from short sentences to paragraphs and finally to full texts, allowing students to gradually build up their writing skills.

Speaking

Controlled speaking activities have been carefully designed to allow students guided practice before leading them to less structured speaking activities.

Everyday English

Functional dialogues set in everyday contexts familiarise students with natural language. The dialogues also present useful expressions so that students can practise everyday English.

Pronunciation/Intonation

Pronunciation/Intonation activities help students to recognise the various sounds of the English language, distinguish between them and reproduce them correctly or make their voice rise/fall to express feelings and emotions.

Note

Brief grammar, explanations and reminders, at various points throughout each module.

Check these words sections can be treated as follows: Go through the list of words before Ss read the text and present the new words by giving examples, synonyms/opposites or miming their meaning. Alternatively, go through the list of words after Ss have read the text and ask Ss to explain the words using the context they appear in. Ss can give examples, mime/draw the meaning or look up the meaning in their dictionaries.

Phrasal verbs & Prepositions

A phrasal verbs & prepositions section appears in every module, which helps students learn these features of the English language.

Across Cultures

In these interesting and informative pages, students are provided with cross-cultural information and read about aspects of various countries which are thematically linked to the module. The section also contains related tasks and creative projects, such as making a poster, which give students the chance to process the information they have learnt and compare it to the culture of their own country.

Fun Time

This section contains activities for Ss to review the content of each module as well as songs. The songs are connected to the themes of the modules as well as related tasks. Listening to lively, high quality songs is a humanistic activity which lowers the students' affective filters and allows them to absorb language more easily.

Revision

This section appears at the end of each module, and reinforces students' understanding of the topics, vocabulary and structures that have been presented.

Monstertrackers

This section appears every two modules and is designed to introduce Ss to reading for pleasure. It is an amusing science-fiction cartoon strip following the adventures of four characters as they track down monsters all around the world. Ss should readily identify with nature-loving Candy, technical Phil and adventurous Tracker along with their buggy, Boogey, who can transform into any mode of transport.

Festivities

This section aims to develop Ss' cultural awareness providing them with information about festivities and celebrations around the world. The texts are followed by activities to give Ss the opportunity to process the information they have learnt.

Reader

This section contains an illustrated literature extract. Ss are given the chance to comprehend key information.

Evaluation

This section appears at the end of the book, and reinforces students' understanding of the topics, vocabulary and structures that have been presented every two modules.

Irregular Verbs

This page provides Ss with a quick reference list for verb forms they might be unsure of at times.

SUGGESTED TEACHING TECHNIQUES

A – Presenting new vocabulary

Much of the new vocabulary in the course is presented through pictures, and students are asked to match the pictures to listed words. Vocabulary is always presented in context, and emphasis is placed on collocations and word association, since memorising new words is easier when they are presented in lexical sets.

Further techniques that you may use to introduce new vocabulary include:

- *Miming.* Mime the word to be introduced. For instance, to present **sing**, pretend you are singing and ask students to guess the meaning of the word.
- *Synonyms, opposites, paraphrasing and giving definitions.* Examples:
 - Present **store** by giving a synonym: *A store is a shop.*
 - Present **tall** by giving its opposite: *He isn't short, he's tall.*
 - Present **weekend** by paraphrasing it: *I don't work at the weekend. I don't work on Saturday and Sunday.*
 - Present **garage** by giving a definition: *A garage is a place where we put our car, next to the house.*
- *Context.* Place vocabulary items in context with examples which make understanding easier and more complete. For instance, introduce the words **city** and **town** by referring to a city and a town in the students' own country: *Budapest is a city, but Sighisoara is a town.*

- *Visual prompts.* Show photographs or drawings to make understanding easier.
- *Use of (bilingual/monolingual) dictionary.* Encourage students to guess the meaning of a word, then use their dictionaries to check if their guess is correct.
- *Sketching.* Draw a simple sketch on the board to illustrate the word(s) to be explained. For instance:

- *Flashcards.* Make flashcards out of magazine or newspaper pictures, photographs, ready drawings and any other visual material which may serve as vocabulary teaching tools.
- *Use of L1.* In a monolingual class, vocabulary can be explained in the students' mother tongue, although this method should be used only in moderation. Students also need to compare their mother tongue to the English language to find similarities and/or differences.

The choice of technique depends on the type of word or expression. For example, it may be easier to describe an action verb through miming, and not through a synonym or definition.

B – Writing

All writing tasks in the course have been carefully designed to guide students to produce a successful piece of writing.

- Make sure that students understand they are writing for a purpose. Go through the writing task in detail so that students are fully aware of why they are writing and who they are writing to.
- It would be advisable to complete the task orally in class before assigning it as written homework. Students will then feel more confident about producing a complete piece of writing on their own.

C – Assigning homework

It is recommended that homework is regularly assigned and routinely checked according to the specific needs of the class.

When assigning writing tasks, prepare students as well as possible in advance. This will help them avoid errors and get maximum benefit from the task.

Commonly assigned homework tasks include:

- *Vocabulary.* Students memorise the meaning of words and phrases.
- *Spelling.* Students learn the spelling of particular words without memorising the text in which they appear.

- *Reading aloud.* Assisted by the Digital Book, students practise at home in preparation for reading aloud in class.
- *Writing.* After thorough preparation in class, students are asked to produce a complete piece of writing.

D – Correcting students' work

All learners make errors; they are part of the process of learning. The way errors are dealt with depends on the activity.

- *Oral accuracy.* In drill work correct students on the spot, either by providing the correct answer and asking them to repeat it, or by indicating the error but allowing students to correct it. Alternatively, indicate the error and ask other students to correct it.
- *Oral fluency.* In pairwork or free-speaking activities allow students to finish the task without interruption, but make a note of the errors made and correct them afterwards.
- *Written work.* Do not over-correct; focus on errors that are directly related to the point of the exercise. When giving feedback you may write the most common errors on the board and help the class to correct them.

Remember that praising students and rewarding good work is of great importance. Post written work on a noticeboard in the classroom or school, or give 'reward' stickers. Praise effort as well as success.

E – Class organisation

- *Open pairs.* The class focuses its attention on two students doing the assigned task together. Use this technique to provide an example of how the task should be done.
- *Closed pairs.* Pairs of students work together on a task or activity, while the teacher moves around the classroom offering assistance and suggestions. Ensure the task is clearly understood before closed pairwork begins.
- *Stages in pairwork:*
 - Organise students into pairs
 - Set the task and time limit
 - Rehearse the task in open pairs
 - Ask students to do the task in closed pairs
 - Go around the class and help students
 - Pairs report back to the class
- *Groupwork.* Groups of three or more students work together on a task or activity. Class projects or role play are often most easily done in groups. Again, ensure students clearly understand the task in advance.
- *Rolling questions.* A student answers a question, then proceeds to ask a question directed at the next student in turn. This continues around the class.

TYPES OF LEARNING STYLES

Experienced teachers will be aware that some of their students learn best by listening to new information, some prefer to read

about it, whereas other students need to do something with the new information. There is no absolute 'best' method of learning; these are all valid learning styles, as different people learn in different ways. Consequently, a coursebook should offer a variety of exercises and material which stimulate all types of learning style in order to help the learners learn according to their personal learning styles.

- *Visual Learners* need to see the teacher's body language and facial expressions to fully understand the content of the lesson. They think in pictures and learn best from visual displays, including diagrams, illustrations, transparencies, videos, flashcards and hand-outs.
- *Auditory Learners* learn best through verbal explanations, discussions, talking things through and listening to what others have to say. Written information may have little meaning until it is heard. They often benefit from reading a text aloud and using a tablet or their laptop.
- *Tactile/Kinaesthetic Learners* learn best through a hands-on approach, actively exploring the physical world around them. They may find it hard to sit still for long periods and may become distracted by their need for activity and exploration. These learners express themselves through movement. They have a good sense of balance and hand-eye co-ordination. By interacting with the space around them, they are able to remember and process information. Involve them in role play, pairwork and other classroom activities.

EVALUATION

Evaluation is an essential part in the learning process. It helps the learners recognise their progress in the target language, how much they have achieved and what areas need further practice. The learners' attitude towards their own learning experience is positively influenced as they participate in the whole process. Evaluation also allows teachers to reflect on the validity of their teaching practices and the types of material being used.

The process is divided into three parts: Initial Evaluation at the beginning of the course, Formative Evaluation, which is done on a day-to-day basis, and Cumulative Evaluation, upon finishing a module.

Initial Evaluation

This evaluation centres mainly on the students' reports from the previous school year. The teacher can assess the students' level, work already covered, work which needs to be covered, strengths/weaknesses, etc.

Formative Evaluation

Any exercise a student does can be used for this type of evaluation. The results are then recorded on the student's Formative Evaluation Chart.

Make as many photocopies as you need and complete the charts as indicated. Write the names of the activities you are going to evaluate (e.g. dialogues, songs, pairwork, etc.) and write the marks obtained with the help of the following code, using colours if you wish.

- c (competence – green): the student has a full understanding of the task and responds appropriately
- w (working on – yellow): the student has an understanding of the task but the response is not fully accurate
- n (non-competence – red): the student does not understand the task and is unable to respond appropriately

Cumulative Evaluation

Cumulative evaluation takes into account the work the students have done throughout the module as well as their participation and attitude. The instruments of evaluation are:

- **Student's Self-Assessment Forms:** After the students have completed the Self-Assessment Form section of each module, they fill out the photocopiable Self-Assessment Form, giving their subjective opinion of their own performance. This learning-to-learn technique enables the students to develop awareness of their progress. The Self-Assessment Forms should be kept in their Language Portfolio for future reference. The Self-Assessment Forms are printed at the back of the Teacher's Book.
- **Progress Report Cards:** After students complete each module and take the corresponding test, photocopy the respective Progress Report Card from the Teacher's Book and fill out a card for each student. The students should keep these cards in their Language Portfolio for future reference.

We were having a nice time when suddenly I saw some water coming towards me! It splashed me all over, and I was really shocked. I was soaked and my cousins were laughing. After a few minutes they explained that throwing water is part of the festival, and I felt better. I started to laugh with them, and I realised that it was a great way to cool down on a hot summer day!

When people think of Romanian food they think of beef soup and cabbage rolls. Although, we still eat this food regularly, we also eat other food.

My name is Vlad, I'm 15 years old and I live in Bucharest. Although there are many different types of restaurant to choose from, I rarely eat out. I usually eat home-cooked meals my parents prepare. I prefer traditional food to fast food or junk food.

For breakfast, I usually eat an omelette with onions and bacon or a cheese pie with a traditional Romanian cheese. For lunch, I often eat a salad with bread and fresh vegetables and some cold sliced meat. In the evening for dinner I often eat soup with meat or vegetables and noodles or stuffed cabbage leaves.

I think the Time Traveller returned to the land of the Eloi to save Weena.

I returned to the land of the Eloi. After several days, I found Weena hiding in the forest. I told her that her life would always be unhappy because of the Morlocks. I persuaded her to get into my Time Machine. We went back in time. When we stopped we were in a land of great beauty. There were very few humans and they were all helping each other. I knew that Weena and I would be very happy here.

Exercise 3 (p. 14)

Martin: Hi Tara! Are you doing anything this Saturday?

Tara: Hi Martin. Not really. I was thinking of taking it easy this weekend. You know, listening to some music, surfing the Net and drawing. Why? Did you have something in mind?

Martin: Well, I really want to go to the cinema and see that new action film that's coming out this Saturday.

Tara: Oh. But I really don't like action films. How about we go shopping in the afternoon?

Martin: I don't think so. I'm playing football with my cousins early in the afternoon and then I promised them I would go and exercise with them at the gym.

Tara: I know! Why don't we go to the amusement park in the evening?

Martin: That's a great idea. How about eating at the fast food restaurant before we go?

Tara: I'm not so sure about that. Let's go to the amusement park first and if we get hungry, we can go and have a bite to eat there.

Martin: Sounds good. So what time do you want to meet?

Tara: How about we meet at 7 o'clock at the main entrance?

Martin: Great – see you there!

Exercise 4 (p. 21)

A celebrity double

Imagine you are at a shop and your favourite famous actor Johnny Depp walks in! You run to get his autograph – but is he Johnny Depp or just someone who looks like him? You don't want an autograph from a celebrity double, do you? But what are celebrity doubles? What do they do?

They are people who look like famous stars. Their job is to go places or play in dangerous scenes of films that the stars they look like can't. Tony Angelotti is Johnny Depp's best look-alike. He doubles for Johnny in films. He took Johnny's place in all the dangerous scenes of *The Pirates of the Caribbean* that Johnny couldn't do. He looks so much like the famous actor that no one noticed the difference between the real actor and the celebrity double. Tony likes what he does. After all, it's nice to have a job just because you look like someone else, even if it's risky at times.

Exercise 3 (p. 25)

Two years ago, my cousins and I went to the international Bathub Regatta while I was visiting them in Dinant, Belgium. People from all over the world come to this festival to show off their strange boats, participate in the race down the river and maybe win one of the many awards. My cousins and I set off early in the morning so we could get a great spot on the river bank and watch all the boats go by. There were boats that looked like animals, bicycles and even buildings. We were really enjoying ourselves. We were

laughing and talking about the boats when suddenly I saw water coming towards me and... Splash! I was soaked from head to toe. I was so shocked that I didn't know what to do. I looked at my cousins and saw them laughing very hard.

After a few minutes, one of my cousins explained to me that the competitors in the boats also threw water at the spectators. I immediately started to laugh. In a sense, it was a great way to cool down on that hot summer day.

Exercise 2 (p. 28)

A The Eternal Flame Falls

The Eternal Flame Falls in Orchard Park, New York are one of a kind. There is a flame, four inches high, burning behind a waterfall till to this day. Scientists say that there must be a gas leak coming from the cracks of the rocks causing the flame to burn.

B The Milky Seas Effect

The Milky Seas Effect is a phenomenon where parts of the water in the sea glow at night. People often notice this on a beach at the Maldives and for many years scientists were unable to explain it. Nowadays, scientists claim that glowing bacteria cause this amazing phenomenon.

C The Crooked Pines

In a large pine forest in Poland there is a stand of 80 crooked pine trees. No one knows what happened to the trees, but some people believe that they were affected by something in their first 10 years of growth.

D The Sliding Rocks

Rocks mysteriously slide across the flat desert in Death Valley in Eastern California, US leaving long trails behind them. But how do they move? Probably this is a result caused by ice and wind according to scientists.

E The Living Stones

In a valley in Costesti, Romania there are rocks that seem to be growing on their own. How is this possible? No one knows for sure. A theory says that the cemented sand around the rock and the falling rain help the rocks grow.

Exercise 7 (p. 35)

I was in Paris, France on holiday and I was out shopping. I came across a beautiful painting in an antique shop and I wanted to get it, but it was a bit expensive. I noticed it was by a famous portrait painter so I bought it. I took it back to Southampton and hung it on my wall. One day my mother came to visit and saw the painting. She told me it was the portrait of my grandmother! The really weird thing was that my grandmother was never in France!

Sally: Hi Tony. Hi Jenny. How are you?

Jenny: Hi, Sally. Actually, my ankle hurts because I twisted it yesterday while I was playing basketball.

Sally: Oh, dear. I'm sorry. Have you done anything to make it better?

Jenny: Well, I put some ice on it and that helped a lot. Tony hurt himself yesterday too, didn't you Tony?

Tony: Yes, I did.

Sally: Really? What happened to you?

Tony: Nothing serious. I just burnt my hand while I was cooking dinner. I put some cream on it and it's a lot better now.

Sally: Well, it seems we've all had accidents lately.

Jenny: Oh no. Don't tell me you hurt yourself yesterday, too?

Sally: Yes. I was rollerblading in the park when I fell and cut my leg. I cleaned the wound and put a dressing on it.

Jenny: Oh well, at least none of us was badly hurt.

Module 4

Exercise 5 (p. 65)

1 Rupert: I couldn't believe it, really. I left my hometown after college and I've lived abroad ever since. Of course, I lost contact with all my schoolmates. You know, I've been so busy working and time goes by so quickly that, I never found the time to go back... Then, one day one of my colleagues suggested I sign up for one of these social networking sites. I never imagined the rest... suddenly I was getting messages from these guys I went to school with 30 years ago. I couldn't believe they even remembered me not to mention searched for me online.

2 Judith: In the beginning I found it really hard to do ... it seemed like my fingers were huge or something and it really annoyed me. After a while, though, I kind of got the hang of it ... and I came to really enjoy it, because it allowed me to be in constant touch with my friends. Before I knew it I was sending up to a hundred or more a day ... mostly gossip to be honest ... and in the end it was like I just had to share everything that went through my mind ... I used to wake up in the middle of the night wanting to text people. People started getting annoyed with me, so I had to do something. I guess I understood that I needed help.

3 Jenna: Well, I have to admit that I spend a few hours a day using one of my many gadgets. During the day, I mostly use my smartphone. It's got everything music, video, Internet, email and even GPS. I use the GPS a lot when I'm out. When I get home I usually switch on my laptop to listen to music, but I'm not always glued to the screen. I check my emails every now and then, and

I might chat online for a while or watch some music videos. So, I suppose you could say I'm a screenager if you like but for me that's pretty normal for my age.

4 Samuel: I'm not going to lie – I have chatted in the past, but only to see what it's about. When I'm online, I'm usually surfing ... you know ... just checking out sites and reading stuff. I like reading up history and I love reading travel blogs, but I'm definitely not keen on all those gossip or networking sites. If I need to get in touch with a friend I usually send them a text. Yeah, I'd say I'm more of a 'text person', and even then only when I need to.

5 Hannah: I don't understand why everyone is making such a fuss. I mean everyone should choose what they want to do in their own free time, and I don't see where the problem is if I don't like going out. Besides, lots of kids like to spend their time in their bedroom ... and it's not like I'm doing anything wrong. I mean ... I do my homework and I don't have any problems at school. So, where's the problem, even if I spend all night online? I wish people would just leave me alone. I don't need them telling me how I should live my life.

Module 5

Exercise 6 (p. 81)

Dennis: Hi Lisa!

Lisa: Oh hi, Dennis! How are you?

Dennis: I'm OK. I just got back from the huge bookshop that opened on Main Street.

Lisa: Really? Did you go alone?

Dennis: No, I went with Ralph, Tamara and John.

Lisa: Great. Did you buy anything?

Dennis: Of course we did. I wanted to buy some comics, of course, but then I saw the latest issue of *Sports Fan* magazine, which had the photo of Lionel Messi on the cover, so I knew I had to have it.

Lisa: I imagine that Ralph bought one too.

Dennis: No. Actually, he didn't even look at sports magazines. He was looking at some computer magazines, but then he decided to get the new *Spiderman* comic.

Lisa: How about Tamara?

Dennis: Well, you know she's crazy about fashion magazines and she was looking forward to buying the latest *Vogue* issue, but she didn't find it, so she decided to buy a gossip magazine which had a feature on teen pop stars and a story on Rob Pattinson.

Lisa: Really? I'm surprised she didn't find it because I just bought it at the newsagent's along with another fashion magazine. Anyway, I'm sure John bought a magazine about music.

Student's Book Audioscripts

Dennis: John was thinking of buying the latest issue of *Jam Zone*, but then, he saw the cover of *PC Weekly*, which had a feature on the best smartphones on the market and decided to get it.

Lisa: Oh! I'm not surprised. He's always looking for the best gadget to buy.

Exercise 6 (p. 95)

Colmar is a picturesque city in the region of Alsace in France. It is only 64 km from Strasbourg, which makes it easy for tourists to get there by train, bus or car.

While in Colmar, you must take the time and visit the city on foot or take one of the many guided tours of the city offered. Make sure you see everything there is to see in this magical city, like Little Venice, the many beautiful architectural landmarks, the museums and the library.

The food in Colmar is another thing no one should miss. Most restaurants serve traditional Alsatian food which will leave you wanting more, such as sauerkraut and fish, Quiche Lorraine and Black Forest gateau.

For the shopping enthusiasts, the best things to buy here are clothes and shoes as they've got a great variety and low prices. Also, souvenirs are very popular. You can buy Alsatian pottery, wine glasses, tablecloths and other household items depicting people in traditional Alsatian dress.

Colmar has also got plenty of accommodation ranging from luxurious four-star hotels to small bed and breakfasts. Whatever your taste, Colmar has got every type of accommodation to suit everybody's needs.

So if you ever decide to visit France, make Colmar one of your stops. You won't regret it.
